Congratulations

New Lenox Fire Protection District

for protecting new homes and all new construction buildings with fire sprinklers

In an initiative to provide improved minimum standards of building and fire safety for residents, visitors, business owners, and firefighters, New Lenox Fire Protection District administrative officials worked closely with the fire district's Board of Trustees to adopt the 2018 International Fire Code with amendments. In doing so, all new construction buildings (including one- and two-family homes) within the unincorporated areas of the district must include fire sprinkler protection.

New Lenox Fire Protection District joins the ranks of more than 110 Illinois jurisdictions that have zero-square-foot requirements for fire sprinklers.

The New Lenox Fire Protection District has made fire sprinklers the front-line defense against fires in order to prevent needless injuries and deaths and greatly reduce property damage from fires.
